

# M6 Pedestal Gun Mount

## Description

The Sabre Defence M6 Pedestal Gun Mount (NSN# 1005-01-411-6341) provides weapons carrying capability for the M998 General Purpose HMMWV vehicle. It is designed to be easily and quickly installed or removed, so that a unit commander can decide, based on threat, which of the following weapons to employ:

M60 7.62mm Machine Gun  
M249 5.56mm Machine Gun  
M240 7.62mm Machine Gun  
MK 19/3 Grenade Machine Gun  
M2 .50 Caliber BMG Machine Gun

The weapons must be installed in their respective carriage and cradle assemblies. The mount allows for unrestricted movement of the weapons in train and elevation. The M6 has the removable, locking internal column that allows the weapon to be raised or lowered to provide the operator with a better sight picture of the target. No modification to the vehicle is required for installation of the mount. The M6 mount is manufactured from aircraft-grade aluminum and stainless steel. It is durable, effective, and an economical piece of equipment. It has been fully tested and type classified by the U.S. Army for unlimited distribution and deployment.

### Feedback from a 1<sup>ST</sup> Lieutenant in the Unites States Army

*"...Your mounts are just the right thing for the job. It's a great feeling to have rugged and dependable hardware you can use when you need it. The troops love the mounts. The "gun trucks" are requested for use by just about every unit that knows we have them..."*
